

## Health Records Release of Information

Students who are admitted to the PTA Program are required to provide proof of compliance with health requirements including the individual's immunization record, which may include immunization records, results of laboratory testing confirming immunity to certain diseases, and results of testing for tuberculosis (skin test or recent chest x-ray). Failure to comply with health requirements may result in dismissal from the Program. Health records will be maintained in a locked space with immediate access only by the Program Director, Director of Clinical Education, and the Dean of Health Sciences. It is also possible that the College President, Vice President of Instruction, Student Services, the Health Sciences Technical Appeals Committee, and the College's legal counsel may also have access to the urine drug screen results in certain situations, such as but not limited to, a student's removal from the Program due to the failure to meet health requirements.

For application to the program, you are only required to show proof of the first Hepatitis B immunization.

By signing the Information and Disclosures Form, the student acknowledges that he/she has read and understands the health and safety requirements and gives permission to Weatherford College to release health records to clinical agencies to which the student has been assigned for clinical education/clinical rotations and to other parties noted above that have a role in the student's education process at Weatherford College.
